**Workers' Compensation Section Request to Publish Court of Appeal Decisions**

The Workers' Compensation Section seeks approval to review and selectively request for certification, publication of Court of Appeal decisions originally designated as unpublished. There is an obvious and acknowledged need for a greater number of published, and therefore citable, appellate decisions pertaining to workers' compensation law. The scarcity of citable case law has lead practitioners to engage in inappropriate efforts to circumvent the prohibition against citing unpublished decisions, resulting in numerous cautions and even threats of sanctions by the judiciary.

Responsible Staff: Pam Wilson

**Recommendation:** Stakeholders – November

**BOT – January 2014**

July #8

**Proposed Revisions to the Legal Specialization Rules**

Staff seeks permission to circulate proposed revisions to the Legal Specialization Rules for public comment. The revised rules were drafted by the State Bar's consultant, in consultation with representatives from the Office of General Counsel and the programs' managers, as part of the State Bar's efforts to streamline its rules and to conform the rules to the State Bar's new standards and style. While some program changes and updates are being recommended, the goal in drafting the revised rules was to make them easier to read, understand and administer.
