

The State Bar *of California*

OPEN SESSION AGENDA ITEM FEBRUARY, 2019 COMMITTEE OF BAR EXAMINERS ITEM O-201

DATE: January 22, 2019

TO: Members, Committee of Bar Examiners

FROM: Amy C. Nuñez, Director, Admissions

SUBJECT: Technical Report on the October 2018 First-Year Law Students' Examination

BACKGROUND

After results from the First-Year Law Students' Examination are released, the Committee of Bar Examiners' (Committee) psychometric consultant prepares a technical report on the examination. The report includes information about the scoring process and summarizes the statistics for that exam taker population.

DISCUSSION

Attached is the report prepared by Roger Bolus, Ph.D., on the October 2018 administration of the First-Year Law Students' Examination.

RECOMMENDATION

It is recommended that the technical report be received and filed; and that the Committee approve the following motion:

MOVE that the technical report on the October 2018 First-Year Law Students' Examination dated November 28, 2018, which was prepared by Roger Bolus, Ph.D., be received and filed.

TECHNICAL REPORT ON THE OCTOBER 2018 FIRST YEAR LAW STUDENTS' EXAMINATION

Roger Bolus, Ph.D.

November 28, 2018

The First Year Law Students' Examination has two parts, multiple choice and essay. The multiple-choice section consists of 100 items dealing with Contracts, Criminal Law, and Torts. Multiple-choice raw scores (i.e., number of items answered correctly) were equated to the October 2013, June 1998 & 2016 exams using 21 items that were common to each of these exams. The equating formula was as follows:

$$\text{Multiple Choice Scale} = (3.7348 \times \text{raw multiple-choice score}) + 0.4505$$

The essay section consisted of four questions in the same subjects as the multiple-choice test. Scores were assigned to answers on a 40 to 100-point scale in 5-point intervals. The candidates' raw total essay scores were scaled to a score distribution that had the same mean and standard deviation as their multiple-choice scores using the following formula:

$$\text{Essay Scale} = (2.6482 \times \text{raw essay total score}) + -423.7709$$

A candidate's total scale score was the sum of that candidate's multiple choice and essay scale scores. Candidates with total scores of 560 or higher pass and those with scores below 540 fail. Candidates in the 540 to 559.9999 range have their essay answers and all their scores reviewed by a member of the Committee's Examination Development and Grading Team.

Of the 282 candidates who took the exam, 43 had total scale scores of 560 or greater and 220 had total scale scores that were below 540. The latter count includes 7 failing candidates who did not complete the exam. Of the 19 candidates in the reappraisal range, 15 passed. The total number passing (58) was 21% of the total number of takers (see General Statistics report printout for details). The table below summarizes the main test statistics for the multiple-choice, essay, and total scores for the 275 applicants completing the exam. There was a 0.60 correlation between their essay and multiple-choice scores.

Score	Raw Scores		Scale Scores		Score
	Mean	Std. Dev.	Mean	Std. Dev.	Reliability
Multiple-Choice	62.24	13.8	232.89	51.53	0.9
Essay	247.96	19.46	232.89	51.53	0.63
Total			465.78	92.24	0.85

The mean raw scores on the Contracts, Criminal Law, and Torts sections of the multiple choice test were 21.9, 19.4, and 20.94. The corresponding standard deviations were 5.95, 4.43, and 5.07.
